Geissinger, H. D.	214	Pearson, A. M.	105		
		Perrin, C. H.	55		

# SUBJECT INDEX

ascorbic acid		enzymes	
degradation of, 93		milk, proteolytic, 145	
<i>B. stearothermophilus</i>		fats	
spore germination, 159		fractionation of, 210	
beef		milk, triglycerides in, 13	
carbon dioxide in packaging, 175		solids content by NMR, 72, 82	
SEM of heated muscle, 184		fish	
texture of, 138		canning of, 25	
browning		mercury in Canadian, A6	
parsnips, 37		SEM of heated muscle, 184	
phloroglucinol and, 207		texture of, 39	
carbon dioxide		folate	
in packaging of beef, 175		activity in foods, 60	
cheese whey		glucosinolates	
in food protein, 87		extraction from rapeseed, 101, 149	
chicken		grapes	
SEM of heated muscle, 184		wine varieties of, 44	
chlorogenic acid		ice cream	
browning of, 207		texture of, 105	
colorimetry		infrared spectroscopy	
'tang', 32		measurement of total solids by, 203	
corn		irradiation	
in Nigerian porridge, 217		effect on milk powder, 191, 197	
cream		lecithin	
texture of, 1		effect on milk reconstitutability, 223	

- mayonnaise
  - electron microscopy of, 134
- meat analogs
  - from yeast and soy protein, 155
  - texture of, 118, 124
- mercury
  - in Canadian fish, A6
- milk
  - effect of lecithin on reconstitutability, 223
  - fat, triglycerides in, 13
  - powder, irradiation of, 191, 197
  - proteolytic enzyme in, 145
- millet
  - in Nigerian porridge, 217
- NMR
  - in determination of solids content of fats, 72, 82
- oils
  - Canbra, A57
- packaging
  - microbial activity and, 222
- parsnips
  - browning of, 37
- pears
  - texture of, 97
- phloroglucinol
  - in browning, 207
- polyphenoloxidase
  - and browning, 207
- pork
  - texture and structure of, 214
- potatoes
  - french fries, 179
- processing
  - fish and mammal, A15
- propionic bacteria
  - effect of rapeseed meal on, 67
- protein
  - food from milk and soybean, 87
  - leaf, 50
  - soybean, as meat analog, 155
  - soybean, texture of, 118, 124
  - yeast as source of, 111
- puddings
  - milk, preparation of, 72
- quality control
  - use of computer in, 55
- rapeseed
  - extraction of glucosinolates from, 101, 149
  - meal, influence on propionic bacteria, 67
  - processing of low erucic acid from, A57
- Salmonellae
  - identification of, 115
- Saskatoon berry
  - in ascorbic acid degradation, 93
- selenium
  - content of foods, 165
- sorghum
  - in Nigerian porridge, 217
- soybeans
  - high protein food from, A39
  - protein, as meat analogs, 155
  - protein in food protein, 87
  - protein, texture of, 118, 124
- spores
  - germination of *B. stearothermophilus*, 159
- starch
  - slurry, texture of, 129
- texture
  - beef, 138
  - cream and toppings, 1
  - fish, 39
  - ice cream, 105
  - pears, acoustic spectrometry of, 97
  - shear press, 6
  - soy protein, 118, 124
  - starch slurry, 129
  - structure and, pork, 214
- tomatoes
  - color of, and carotenoid content, 170
- total solids
  - measurement by infrared spectroscopy, 203
- water, waste
  - treatment of cannery, 22
- wine
  - grape varieties for, 44
- yeast
  - protein from, 111
  - use in meat analogs, 155
  - viability of, 173
